▶ LP DISPLAY PROFILE

12⁺

Years of Experience

90,000m²

Factory Area

2,000⁺

Successful Cases

Founded in 2012, LP DISPLAY has been committed to improving human's display technology and experience, and today, there has many successful cases around the world, which all reflect LP display's continuous innovation and breakthrough in the field of LED display.

LP Display focuses on fine pixel pitch LED display products developmeny and manuactuering, with the industry's most advanced product design and product concept, covering a variety of product technologies including SMD,GOB, Flipchip COB and MIP, to provide customers with comprehensive, reliable and competitive fine pixel pitch LED display products. Based on the needs and experiences of customers, LP Display constantly improves ourselves, continuously innovates, vigorously increases the investment in R&D and production, and promotes the development of the industry.

With more than 12 years of experience in the industry, LP Display has become one of the leading LED screen solution providers. Since its establishment, the company has continued to develop and grow, and now has a production base of more than 90,000 square meters, a production and sales team of more than 500 people, a R&D team of more than 50 people, and thousands of successful applications.

Two
Manufacturing
Centers

PRODUCTION BASES

LP DISPLAY operates a central research institute along with two manufacturing bases: the Dongguan Huangjiang production center and the Hunan Zhuzhou LP industry park.

They are equipped with automated high-precision production equipment, such as dust-free production workshop, CNC high-precision production workshop, aging workshop, high-speed SMD mounter, etc.

Two Manufacturing Bases

Dongguan Huangjiang Production Center

Hunan Zhuzhou LP Industry Park

Autonomous Production Lines

SMT Automated Production Line

10 fully automated ROHS compliant SMT lines

COB Production Line

500 fully automated COB lines, capacity: 6,000m²/month

CNC Production Line

Fully automated CNC lines, capacity: 30,000 units/month

GOB Automated Production Line

1 fully automated GOB line, capacity: 2,000m²/month

Outdoor Automated Production Line

2 outdoor automated lines, capacity: 5,000m²/month

Plate Automated Production Line

Fully automated plate workshop, supports cabinets and all-in-one machines

Optical Laboratory

Testing for display optical performance and color gamut

Testing Center

Facilities for 3D measurement, salt spray, vibration and destructive testing

R&D Center

80-person R&D team focusing on structure, electronics, hardware, software, and optics

COB Aging Test Workshop

Simultaneous aging testing for 6,000m²

Standard Product Display Center

Showcasing standard units

Molding Automated Workshop

Fully automated COB molding workshop, capacity: 8,000m²/month

▶ PATENTS AND CERTIFICATIONS

Innovation is the driving force of our company's development, and LP DISPLAY has obtained more than 150 patents, including three U.S. invention patents.

Invention Patents

Utility Model Patents

75⁺

Utility Model Patents

25⁺

Invention Patents

CERTIFICATIONS

Product quality is the cornerstone of the development of the company, LP DISPLAY products have obtained numerous domestic and international certifications, such as ISO9001, CCC, CE, FCC, ROHS, ETL, CB, PSE, etc.

65⁺

Black Elves Series

Full Flip Chip Indoor Fine Pitch Fixed LED Display

Various Pixel Pitch Options are Available for Easy Future Upgrades

Available in multiple pitches (0.62-1.87mm), easy upgrade by just replacing the module.

Energy-efficient Flip Chip Design

Full Flip chip and common cathode design for significant electricity cost savings.

Cableless Design for Safety & Maintenance

Integrated cableless design enhances safety and allows for quick maintenance.

Ultra-slim Cabinet for Space & Cost Saving

Ultra thin cabinet with thickness only 28mm, whole video wall super thin and reduce transportation costs.

High Protection & Lightweight Design

Waterproof, dustproof, anti-static, and shock-resistant.

Product Size

Product Introduction

Full Flip Chip COB Panel

No welding wire, reduce the failure rate of the lamp bead.
Full flip chip, no welding pad block, high luminous efficiency, and wider view angle.
Light-emitting chip direct contact with the PCB, which improves heat dissipation.

High Brightness

Standard brightness up to 1,000 nits.

Ultra High Contrast Ratio

Exceeding 15,000:1 contrast, the image is clear and bright, with details fully revealed.

COB Package Protection

- Anti-collision
- Anti-oxidation
- Moisture-resistant
- Easy-clean
- Anti-static

Ultra-light and Ultra-thin

At 28mm thickness and only 4.8kg cabinet weight

4.8kg

Wider View Angle

Flip chip COB makes wider view angle 170°/170°.

Specifications

Model	63J06	63J07	63J09	63J12	63J15	63J18
Pixel Configuration	COB					
Pixel Pitch(mm)	0.625	0.78	0.93	1.25	1.56	1.875
Cabinet Size (mm)(W×H×D)	600 x 337.5x28					
Cabinet Resolution(W×H)	960x540	768x432	640x360	480x270	384x216	320x180
Cabinet Weight(kg/cabinet)	4.8					
Refresh Rate(Hz)	3,840~7,680					
Contrast Ratio	15,000:1					
Grayscale(bit)	16					
Brightness(nits)	1,000 (3,500 optional)					
Max. Power Consumption(W/m²)	≤450					
Avg. Power Consumption(W/m²)	≤150					
Viewing Angle (H/V)	170°/170°					
Working Voltage	AC 100V~240V,50~60Hz					
Lifetime(H)	100,000					

Magic Cube Series

Indoor Fine Pixel Pitch Fixed LED Display

- Die-casting Aluminum Cabinet**
High precision, light weight, good flatness.
- SMD/MIP Optional**
SMD or MIP are available now.
- Common Cathode Energy Saving**
MIP package use common cathode current design for energy saving and reduce video wall temperature.
- Redundancy**
Dual receiving card and power supply optional.
- Fully Front Maintenance**
Integrated wireless design for higher stability and fast maintenance.
- High Protection**
MIP+GOB package brings moisture-proof, dust-proof, antistatic and anti-collision.

Product Size

Regular: 600x337.5x58

Ultra Thin: 600x337.5x38

Product Introduction

Ultra High Contrast

With a contrast ratio 20,000:1, it displays darker, sharper images for a softer screen.

Magic Cube Series: Low brightness, high gray scale

Traditional Displays: Low gray scale, poor performance

Traditional Displays

Magic Cube Series

MIP with Full Flip Chip& Common Cathode

Energy saving

High contrast ratio

Wider view angle

GOB High Protection

Special treatment with GOB technology, enabling surface water-resistant, dust-resistant, impact-resistant and anti-static.

Anti-collision

Anti-oxidation

Moisture-resistant

Easy-clean

Anti-static

Ultra-low Power Consumption & Temperature Rise

Using flip chip LED and common cathode drive, it consumes 30% less energy and runs cooler than standard fine pitch LED displays.

Specifications

SMD

Model	63L09	63L12	63L15	63L18	63L25	63L37

GUARD Series

Indoor Full Flip Chip Common Cathode LED Display

5G Large Bandwidth Capability

Improve data transmission efficiency and reduce data cable quantity.

Cold Screen

Full flip chip common cathode design make a cold screen.

Frequency Frame Adaptation

Automatically adapts to video inputs with different frame rates ranging from 23Hz to 240Hz, and supports custom frame rates up to 0.01 Hz in steps.

More Stable with Redundancy

Dual receiving card and power supply options for more safety application.

Comprehensive High-protection Features

Moisture, dust, static, and collision resistant with COB package.

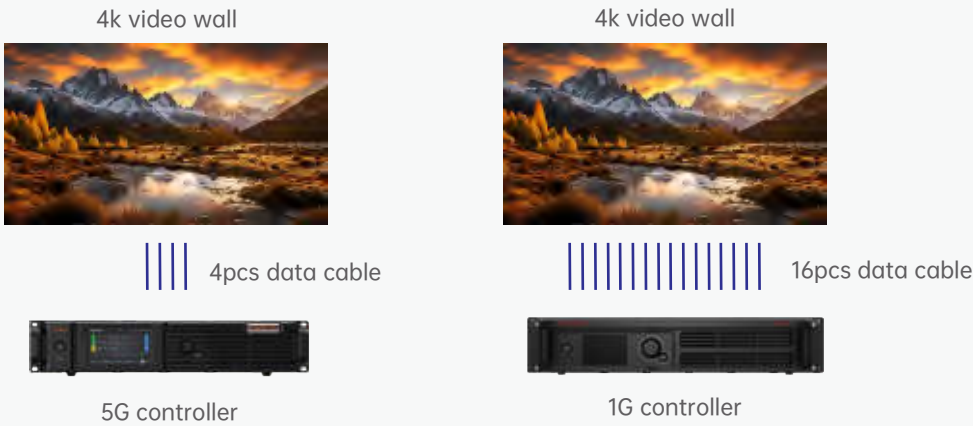

Product Size

Product Introduction

5G Large Bandwidth Capability

The Guard series offers advanced 5G transmission and control technology, specifically designed for Mini or Micro LED displays with high pixel density. Same resolution video wall with 5G control system can greatly reduce data cable quantity and wiring work, reduce the failure rate, make the work much simpler.

High Contrast Ratio

15,000:1 high contrast ratio make the video wall bright and vivid.

Better Heat Dissipation

The cabinet rear cover is designed with heat dissipation holes, which help to dissipate heat and improve stability.

Dual Engines for Stunning Image Quality

Equipped with image quality engine 2.0 and a new dynamic engine technology, it achieves ultimate enhancement in picture detail and dynamic contrast, bringing display images to life with stunning clarity and charm.

Image Booster

Dynamic Booster

Multi-layer Calibration

Calibration under various brightness conditions to ensure good consistency whether it is high or low brightness.

Intelligent Frame Rate Adaptive Switching

Automatically adapt to video inputs with different frame rates and support custom frame rates.

Specifications

Navigator Series

Ultra Wide Indoor Fine Pixel Pitch Display

- 
21:9 Ultra Wide Display Ratio
 Create a 21:9 conference experience.
- 
Big Size Module
 Navigator series with larger 200x337.5mm modules for faster splicing & superior display.
- 
SMD&COB
 Two types of display panels are available: SMD and COB.
- 
Dual Backup
 Automatic switchover in case of main card or power supply failure, ensuring uninterrupted display.

Product Size

Product Introduction

21:9 Ultra Wide Display Ratio

With its unique 21:9 display ratio design, it is perfectly suited for e-sports and ultra wide screen conference system.

Navigator Series

VS

Others

16-bit Processing Depth

Less Splicing Lines

Support full front maintenance, featuring hot-plug modules and cable-free connection. This design saves time and labor there by making users handle the LED screen with ease.

Dual Backup

In the event of a failure of the main receiving card or power supply, the backup system will automatically switch over, ensuring that the display remains uninterrupted. This feature enhances the stability and reliability of the large-screen display.

COB + Full Flip Chip LED + Common Cathode

Energy-efficient, low power, high refresh, HDR, 16-bit gray for dynamic & low-brightness displays.

Mega Series

Indoor Full Flip Chip Common Cathode LED Display

Pixel Pitch Variability

Full available pixel pitch options include 0.6/0.7/0.9/1.2/1.5/1.8mm.

Large Size Panel Design

1,200x675x28mm large size panel design, less splicing gap, better flatnees and reduce installation time.

DCI-P3 Color Gamut Coverage

Offers 97% DCI-P3 color gamut options.

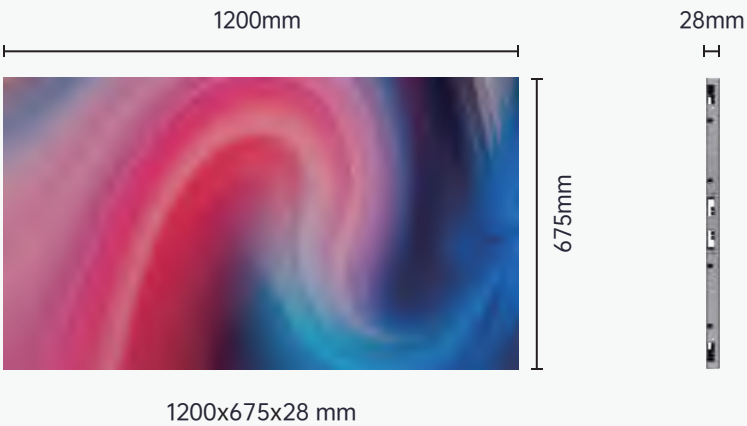

Full Flip Chip Common Cathode Design

Features a full flip chip common cathode design, which reduces power consumption and promotes environmental protection.

Product Introduction

Large Size Cabinet Design

1200x675mmx1

Large-size cabinet design

VS

600x337.5mmx4

Reduce splicing gaps

Reduce installation time

Save labor cost

Configured with The Most-advanced Drive IC

- ▲ Common cathode PWM constant current driver IC, energy saving.
- ▲ Large channel , integrated column and vertical control IC, less IC, less heat dissipation.
- ▲ High gray level 16bit, work with control system can be 22bit+ color processing depth.
- ▲ 7,680HZ refresh rate, available for XR solution.

Full Flip Chip Common Cathode COB Panel

- ▲ Full flip chip, no welding pad block, high luminous eiciency, and wider view angle.
- ▲ No welding wire, reduce the failure rate of the lamp bead.
- ▲ common cathode design, reduce power consumption, green and environmental protection.

COB Package Protection

- Anti-collision
- Anti-oxidation
- Moisture-resistant
- Easy-clean
- Anti-static

Light-weight Design

light-weight design, save your labor cost during installation.

Diamond Series

Ultra HD Indoor Fine Pixel Pitch LED Display

GOB High Protection

The diamond LED display uses GOB technology for waterproof, dust-proof, and anti-collision protection.

Multiple Cabinet Sizes

Available in various sizes to suit different applications.

Easy Maintenance

Supports full front maintenance with hot-plug modules and cable-free connections.

Seamless Splicing

Cabinets can be seamlessly combined into large screens, mixing 960x480mm and 480x480mm sizes.

Product Size

Product Introduction

GOB High Protection

The diamond series LED display uses special GOB packaging technology with an excellent product performance, featuring waterproof, dust-proof, damp-proof, anti-collision and anti-static.

- Anti-collision
- Anti-oxidation
- Moisture-resistant
- Anti-static

Seamless Splicing

The cabinets can be seamlessly spliced into a large screen, cabinet sizes of 960x480mm and 480x480mm can be mixed and spliced together.

Easy Maintenance

Supports full front maintenance, featuring hot-plug modules and cable-free connection.

Multiple Cabinet Sizes

Various cabinet sizes are available to meet specific application needs.

Butterfly Series

Ultra Wide Indoor Fine Pixel Pitch Display

- Die-casting Aluminum Cabinet**
High precision, light weight, good flatness.
- Single Face/Double Face**
Single face and double face are available to meet various needs.
- Flexible Application**
Hanging, stacking, wall mounting.
- Hard Link**
Power supply, receiving card and HUB board are hard connection for better stability.
- Fully Front Maintenance**
All components can be replaced from front side.

Product Size

Product Introduction

Single/Double Face Cabinet

Single face cabinet

Double face cabinet

High Gray Level

16 bit gray level makes the image exquisite and soft, bright and vivid.

Easy Maintenance

All components support full front maintenance.

GOB High Protection

Surface treatment with GOB coating, enabling surface water- resistant, dust-resistant, impact-resistant and anti-static.

- Anti-collision
- Anti-oxidation
- Moisture-resistant
- Easy-clean
- Anti-static

Hanging Beam Optional

Support hanging application.

Single hanging beam: 500mm length

Double hanging beam: 1000mm length

LA Series

Indoor & Outdoor Rental LED Display

- 
Two Size Cabinet Options
 500x500/500x1,000mm two size cabinet options, big and small cabinet can splicing for more size requirement.
- 
Fast Maintenance Design
 Supports front and rear maintenance for modules, and rear maintenance for the power box.
- 
Corner Protect Design
 Protects LED lamp bead edges during transportation.
- 
Efficient Heat Dissipation Design
 Power box back cover features a cooling plate to enhance heat dissipation.
- 
Multiple Splicing Modes
 Can be assembled into pillars, curves, flats, and supports 90-degree and arc installations.

Cabinet Modular Design

Modules, frames, and power box modular design allow for fast disassembly and easy maintenance.

Product Introduction

Product Size

Multiple Splicing Modes

Corner, Curve & Flat

- ▲ 90-degree cube shape installation.
- ▲ Concave and convex installations.
- ▲ 500x1,000mm and 500x500mm cabinet vertical splicing.

Corner display

Curve display

Flat display

Corner Protector Design

The cabinet features a corner protector design, to protect the edges of the lamp beads will not be damaged during transportation.

Fast Maintenance

Modules support front and rear maintenance, the power box supports rear maintenance.

Front maintenance

Rear maintenance

Removeable power box

LX Series

High-end Rental Product

COB and SMD Optional

Supports both SMD and COB display panels for selection.

COB Common Cathode Design

Reduces heat, reduce temperature rise, enhances product stability.

Wider View Angle

Flip chip COB can make wider view angle 170°/170°.

Ultra-high Refresh

7680hz ultra-high refresh design, no fear of various shooting scenes.

Flexible Application

-6°to +6° high-precision arc lock, support for concave and convex splicing, uniform arc transition.

Product Size

Product Introduction

Flexible Installation

Curve lock optional with -6°, -3°, 0°, 3°, 6°, for flexible installation.

±6° curve lock

concave and convex

Installation Frame

Hanging

Stacking

Hanging/stacking beam

Lifting ring for hanging

Foot support for stacking hanging

The hanging beam and ground beam are designed as a two-in-one system, allowing the hanging beam as a ground beam when paired with the base.

Modular Design

Cabinet modular design, front and rear maintenance, convenient and quick.

Snap-on Power Box

Unlike traditional power boxes that are fixed with screws, the LX series power box uses a snap-on design, allowing for quick replacement of the entire power box in the event of a fault.

Fixed power box

Remove power box

Ark Series

Indoor Fine Pixel Pitch Rental Display

16:9

Perfect Display Ratio
16:9 ratio, supports 2K to 8K resolutions for quick rental setups.

Shield

GOB High Protection
Waterproof, dustproof, impact-resistant, anti-static with GOB technology.

Wrench

Easy Installation and Maintenance
Protects the edges of LED lamp beads during transportation.

Product Size

Ark Series
Winner of the 2021 Red Dot Design Award

Product Introduction

Perfect Display Ratio

16:9 golden ratio, seamlessly achieves resolutions including 2K, 4K, and up to 8K for rental quick installation.

						[PH1.25-4K][PH2.5-1080P] 4,800x2,700mm
				[PH0.9375-4K] [PH1.875-1080P] 3,600x2,025mm		
				[PH1.56-1080P] 3,000x1,687.5mm		
		[PH0.625-4K] [PH1.25-1080P] 2,400x1,350mm				
	[PH0.9375-1080P] 1,800x1,012.5mm					

Easy Installation and Maintenance

Front maintenance design, easy installation and maintenance, it supports hanging, standing and stacking installation.

The Smallest Pitch in Rental Area: P0.9

Pixel pitch: P0.9, P1.17, P1.25, P1.56, P1.875, P2.5, P3.7
Cabinet size: 600x337.5mm

GOB High Protection

Special treatment with GOB technology enables surfaces to be waterproof, dustproof, impact-resistant, and anti-static.

- Anti-collision
- Anti-oxidation
- Moisture-resistant
- Easy-clean
- Anti-static

FX Series

Indoor Fine Pixel Pitch Rental Display

Excellent Product Performance

Sturdy die-cast aluminum, corrosion-resistant, deformation-free and stylish.

Infrared Induction

Tracks your every step and present visual effects in real-time.

Moisture-proof and Anti-skid

Specialized materials and sealing processes for waterproof and anti-skid features.

Interactive Customization

Built-in sensors and UDP protocol for interactive content, with 128 sensor chips persquare meter for multi-person interactions.

Support XR solution

Low scan version can support XR.

Product Size

Product Introduction

Infrared Induction

The infrared sensing technology precisely captures every move you make, whether it's a light step or a graceful dance. The ground screen responds instantly, presenting stunning and colorful visual effects.

Interactive Customization

The LED intelligent interactive floor tile screen features built-in sensors and utilizes the UDP protocol to generate interactive content. Each square meter of the screen can integrate 128 low-density sensor chips, enabling multi-person and point-to-point interactions.

HD Display

Multiple pixel pitch options are available, with the smallest pixel pitch being 1.25mm, resulting in a clear and delicate display.

Excellent Product Performance

Die-cast aluminum enclosures are structurally sturdy, corrosion-resistant, not easily deformed, and aesthetically pleasing. Specialized materials and sealing processes for waterproof, anti-skidfeatures.

- Corrosion-resistant
- Not easily deformed
- Moisture-resistant
- Anti-skid

DOOH

- NOX Series
- Obesum Series

NOX Series

Semi Outdoor Fine Pitch Fixing Product

Ultra High Definition Display
Smallest pitch, smooth, detailed, high brightness.

High Protection
Waterproof, dustproof, impact-resistant, anti-static.

Effectiveness
Chroma, brightness, grayscale, thermal correction;
high refresh, wide gamut, HDR, 16-bit grayscale.

Full Flip Chip MIP Panel
Flip chip Mip technology, no welding pad block,
high luminous efficiency

Product Size

Product Introduction

Ultra-high Refresh

7680hz ultra-high refresh design, no fear of various shooting scenes.

High Protection

Special treatment with GOB technology enables the surface to be waterproof, dustproof, impact-resistant, and anti-static.

- Anti-collision
- Anti-oxidation
- Moisture-resistant
- Easy-clean
- Anti-static

Effective

High order control system supports chroma, brightness, full grayscale, and thermal correction; ultra-high refresh rate, wide color gamut, HDR picture display, and 16-bit high grayscale with low brightness.

Obesum Series

Full Outdoor Common Cathode LED Display

Rich Full Pixel Pitch
P1.95, P2.6, P2.9, P3.9, P4.4, P5.7, P6.6, P8, P10.

Common Cathode with Energy-saving
Save energy, reduce heat and improve stability.

Real Color, More Realistic Picture
High refresh, high brightness, high contrast ratio, vivid picture.

IP66 Protection Level
Durable, resists harsh environments.

Modular Cabinet Design
Easy maintenance, quick assembly.

Multiple Sizes Available, Flexible Installation
Various cabinet sizes can be selected and spliced with each other.

Easy to Maintain

Frame, power box, modules are modular design for fast front & rear maintenance.

- Transformer Series

S-Poster Series

Indoor Fine Pitch Poster Machine Display

Excellent Display Effect

Delivers stunning contrast and vibrant imagery.

Ultra-thin and Compact Design

30mm thick, space-saving, mobile.

Versatile Installation Options

Bracket, base, hang, cascade, wall mount.

Front-accessible Maintenance

Front-access components for easy replacement.

Cable-free and Hot-plug Capability

Integrated design, high stability.

Effortless Connectivity

Controls via 5G, LAN, USB.

Cloud-based Intelligent Control

Release programs anywhere, anytime.

TOP-COB Technology for High Protection

Fully sealed for high protection.

Applications

- **Exhibitions:** Gallery, Booth
- **Rental:** Stage, Wedding, hotel, Conferance, Competition
- **Commerce:** Catering, 4S stores, Jewelry stores, Cinemas, Shopping malls
- **Public:** Government, Medical institutions, Education, Bank, Telecom Public
- **Public Transport:** Airport, Railway station, Bus station

Product Introduction

Ultra-thin & Compact Design

Only 30mm thick display area, occupying little space, and movable with wheels.

Versatile Installation Options

Bracket standing, base standing, hanging, multi-screen cascade, wall mounting.

Bracket Standing

Base Standing

Hanging

Multi-screen Cascade

Wall Mounting

Fast Maintenance Design

All components can be replaced from the front side of the product, convenient and fast.

Easy Connection

Easily controlled by 5G signal, LAN cable, and USB. Multiple connection options for configuration.

Cloud Intelligent Cluster Control

Release programs from the cloud without geographical restrictions, anytime, anywhere.

Support TOP-COB Technology, High Protection

Through the TOP-COB technology, the module surface is fully sealed with epoxy resin, providing complete protection for the product against various external influences.

- Dust-proof
- Damp-proof
- Abrasion-proof
- Anti-collision
- Antistatic
- Anti-oxidation

Pixel Pitch(mm)	1.25	1.5	0.75	1.56	0.78
Dispaly Size(mm) (WxH)	2,400x1,350	2,880x1,620	2,880x1,620	3,000x1,687.5	3,000x1,687.5
Package Size(mm)	1,650x1,760x520	2,170x2,084x520	2,170x2,084x520	2,050x2,150x520	2,050x2,150x520
Resolution (WxH)	1,920x1,080	1,920x1,080	3,840x2,160	1,920x1,080	3,840x2,160
Overall Weight(kg)	470	520	520	550	550
Refresh Rate(Hz)	3,840~7,680				
Grayscale(bit)	14~16				
Brightness(nits)	1,000				
Max. Power Consumption(W)	≤1,460	≤2,100	≤2,800	≤2,280	≤3,030
Avg. Power Consumption(W)	≤650	≤840	≤1,120	≤900	≤1,200
Color Temp(K)	2,000~12,000				
Working Voltage	AC 100V~240V,50~60Hz				
Control Panel Type	Remote control/Touch panel				
Interface	HDMIx3,3.5x1,USB3.0x1,USB2.0x1,RJ45x1				
WIFI Mode	Wifi-5G bandx1,Wifi-2.4G bandx1,Wifi-APx1				
Lifetime(H)	100,000

Flex Series

Indoor Creative LED Display

Multi-form Cabinet
Flat cabinet, concave cabinet, convex cabinet, edge-cut cabinet.

Compatible Panels
Cost-saving compatibility with different pixel configs (SMD/MIP/COB).

Smooth Curve
High-precision CNC and semi-soft PCB for creative arc designs.

Easy Maintenance
Front maintenance, hot swapping for quick module replacement.

Product Form

Flat(SMD/COB/MIP)

Right angle(SMD/COB/MIP)

Convex(SMD+GOB)

Concave(SMD+GOB)

Product Introduction

Product Size

Full size cabinet

Half size cabinet

Smooth Curve

CNC five-dimensional processing is used to create curved surfaces on die-cast aluminum cabinets, along with soft and flexible PCBs and high-precision customized CNC angle connection plates, to deliver excellence.

Die cast aluminum curve cabinet

CNC machining aluminum connection Plate

Circular Display

Minimum diameter 1,145.9mm, consisting of 12 cabinets arranged to form a circular display.

Easy Maintenance

Specifications

Model	36A12	36A15	36A18	36A25	36A12	36A15
Pixel Configuration	SMD				MIP	
Pixel Pitch(mm)	1.25	1.56	1.87	2.5	1.25	1.56
Cabinet Size (mm)(W×H×D)	300x675x58					
Cabinet Resolution(W×H)	240x540	192x432	160x360	120x270	240x540	192x432
Cabinet Weight(kg/cabinet)	6.8					
Refresh Rate(Hz)	≤3,840					
Grayscale(bit)	14~16					
Brightness(nits)	800	800	800	1,200	1,000	1,000
Max. Power Consumption(W/m²)	≤725	≤680	≤600	≤660	≤450	≤450
Avg. Power Consumption(W/m²)	≤240	≤230	≤200	≤220	≤150	≤150
Viewing Angle (H/V)	140°/140°					
Working Voltage	AC 100V~240V,50~60Hz					
Lifetime(H)	100,000					

Yoga Series

High-end Rental Product

Flexible Modules
Customizable cabinets for specific projects.

High Resolution Modules
Various pixel pitches for high-resolution video and creative displays.

Customized Shape
Concave & convex options, minimum diameter 763.9mm.

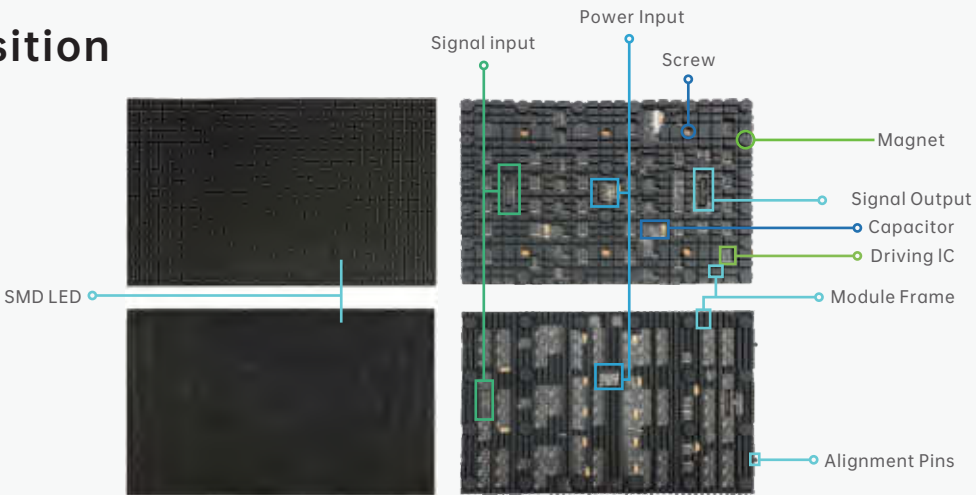

TOP-COB Technology & High Protection
Fully sealed surface with epoxy resin for protection.

Seamless Assembly
Curved walls, seamless corners.

Module Composition

Product Introduction

Flexible Modules, Customized Shapes

Soft and front service modules, cabinet can be customized according to specific project.Both concave and convex available. Minimum diameter can be only 763.9mm.

Seamless Assembly

Yoga series allows for seamless convex or concave LED designs where traditional flat / hard panels will not work.

TOP-COB Supported

Yoga series can be TOP-COB supported, which can achieve high level of anti-collision, anti-water, anti-dust, protecting screen effectively, work properly in corrosive, damp and mist environments.

- Anti-collision
- Anti-oxidation
- Moisture-resistant
- Easy-clean
- Anti-static

Specifications

Model	YG12	YG16	YG18	YG25	YG3	YG4
Pixel Configuration	SMD
